

**HealthCare ID Solutions from SATO**

***A comfortable fit***

**We understand  
your challenges**

## **New regulations protect patient safety, security and privacy**

In these times of tight budgets and short staffing, the potential for tragic medical errors is a major concern for today's health care professionals. New regulations have been put in place to protect patient safety, security and privacy.

## **New technologies enhance patient safety**

Technologies, such as barcoding, radio frequency identification (RFID) and robotics can reduce the amount of time nurses spend on supply management and documentation, enabling them to focus their attention on the administration of safe and efficient medication. In fact, it has been proven that barcode-enabled point-of-care (BPOC) systems can reduce medication errors by as much as 75 percent.

## **Selecting the right technology partner**

SATO HealthCare ID is the health care industry's first single-source provider of

barcode printing applications for accurate, efficient and cost-effective patient identification, tracking and security.

Designed to facilitate compliance with recent government and industry initiatives, SATO HealthCare ID solutions have been developed to help protect your patients from potentially harmful events and the unauthorized dissemination of private medical information.

## SATO makes it easy

If you're implementing BPOC verification systems or similar patient safety technologies, SATO HealthCare ID can simplify the process, helping you minimize implementation costs and maximize point of care efficiencies and productivity. We offer you a single source for comprehensive solutions that include thermal barcode printers, application software/middleware and consumables/print media. Our desktop-based systems are designed for fast installation with little or no customization and minimal involvement from the hospital Information Technology department. What's more, our solutions are priced below most departmental budgets and offer a low cost of operation.

## SATO HealthCare ID application solutions include:

- Patient tracking
- Asset tracking
- Laboratories
- Secure parcel tracking
- Pharmacy
- Supply room inventory

## Experience you can trust

As a premier manufacturer of thermal printing technology since 1979, millions of customers worldwide have experienced the benefits of SATO's reliable, dependable and cost-efficient identification solutions.
